OBJECTIVE

Motivated AI/ML enthusiast and Computer Engineering student with hands-on experience in Python, machine learning, data analysis, computer vision and Streamlit deployment. Interested in building practical ML models, AI-powered applications and data-driven solutions for real-world problems.

AI/ML PROJECTS

Laptop Price Predictor

Built a machine learning based laptop price prediction system that predicts price from laptop configuration such as brand, RAM, CPU, GPU, storage, screen resolution, operating system and weight.

Tech: Python, Pandas, NumPy, Scikit-learn, Regression Model, Streamlit

Live App: tej-laptop-price-predictor.streamlit.app/

Face Mask Detection System

Developed a computer vision application that detects faces and classifies whether a person is wearing a mask or not using a trained model and image-based prediction workflow.

Tech: Python, OpenCV, TensorFlow/Keras, NumPy, Streamlit

Live App: face-mask-detection-tej.streamlit.app/

Olympic Data Analysis Dashboard

Created an interactive analytics dashboard to explore Olympic data with filters, visual analysis and insights on medal trends, athletes, countries, sports and historical performance.

Tech: Python, Pandas, Data Visualization, Streamlit

Live App: olympic-app-tej.streamlit.app/

EXPERIENCE

QA Automation Tester - Selenium

- Performed Selenium-based automation testing and executed test cases to identify bugs.
- Assisted in debugging, defect reporting, workflow validation and regression testing to support stable releases.

PROJECT STRENGTHS

- Built and deployed real working Streamlit applications, not only notebooks.
- Used ML/CV libraries to convert raw data and images into practical prediction systems.
- Comfortable with GitHub deployment workflow and debugging dependency issues.

AI/ML FOCUS

- Supervised learning, regression, data preprocessing and model evaluation.
- Computer vision workflows including face detection and image classification.
- End-to-end project flow: data preparation, model building, app UI and deployment.

CORE SKILLS

- Python Programming
- Machine Learning
- Data Analysis
- Data Visualization
- Pandas and NumPy
- Scikit-learn
- OpenCV
- TensorFlow / Keras
- Streamlit App Deployment
- SQL and Database Basics
- Git and GitHub
- Problem Solving

EDUCATION

LJ University, Ahmedabad

B.E. in Computer Engineering

Expected 2027

K.V. SAC Vastrapur

12th CBSE, 2023

CERTIFICATES

- Python for Everybody - Coursera
- Machine Learning - Coursera (Andrew Ng)
- Data Visualization using Python - Kaggle

ABOUT ME

I enjoy building practical AI/ML projects, creating interactive Streamlit apps and improving my skills in Python, data analysis, computer vision and model deployment.
