

TEJ DABHI

OBJECTIVE

Motivated software developer with a strong foundation in Node.js and web technologies, seeking to build scalable backend systems, develop efficient APIs, and contribute to high-performance applications while continuously enhancing technical skills

EXPERIENCE

QA AUTOMATION TESTER (SELENIUM)

Performed Selenium-based automation testing, created and executed test cases to identify bugs, assisted in debugging and defect reporting, validated application workflows, and supported regression testing to ensure stable releases.

PROJECTS

MERN Theatre Management System

Developed a full-stack theatre management system using the MERN stack to manage movies, shows, and bookings. Implemented user authentication (login/signup) with JWT and protected routes to ensure secure access. Built RESTful APIs for handling show schedules, seat booking, and user data.

MERN CRUD Application

Built a full-stack application with complete CRUD functionality using the MERN stack, integrating frontend and backend through REST APIs and Axios, managing database operations with MongoDB, and identifying and resolving data handling and API-related issues.

CERTIFICATE

Python for Everybody — Coursera
Machine Learning — Coursera (Andrew Ng)
Data Visualization using Python — Kaggle
