

TEJ DABHI

OBJECTIVE

Motivated software developer with a strong foundation in Node.js and web technologies, seeking to build scalable backend systems, develop efficient APIs, and contribute to high-performance applications while continuously enhancing technical skills

EXPERIENCE

QA AUTOMATION TESTER (SELENIUM)

Performed Selenium-based automation testing, created and executed test cases to identify bugs, assisted in debugging and defect reporting, validated application workflows, and supported regression testing to ensure stable releases.

PROJECTS

MERN Theatre Management System

Developed a full-stack theatre management system using MongoDB, Express.js, React.js, and Node.js for managing movies, shows, and ticket bookings. Implemented JWT-based login/logout authentication with protected routes for secure user access. Built RESTful APIs for show scheduling, seat booking, and user management.

MERN Authentication System

MERN Authentication System

Built a secure MERN authentication system with login and logout functionality using JWT, bcrypt, and protected routes. Implemented password encryption, user verification, and session-based authentication with REST APIs.

Repository: <https://github.com/TejDabhi/Login-MERN>

CERTIFICATE

Python for Everybody — Coursera
Machine Learning — Coursera (Andrew Ng)
Data Visualization using Python — Kaggle

ABOUT ME

I am passionate about solving technical problems and helping users navigate digital systems efficiently. I focus on clear communication, quick issue resolution, and continuously improving my technical and customer handling skills.

EDUCATION

LJ UNIVERSITY, AHMEDABAD

— B.E. IN COMPUTER
ENGINEERING (EXPECTED
2027)

**K.V. SAC VASTRAPUR — 12TH
CBSE (2023)**

SKILLS

Technical troubleshooting
API understanding
MERN stack basics
SQL & database handling
Problem solving
Adaptability
